PROFESSIONAL SUMMARY

Computer science and engineering technology student with hands-on experience in software development, automation, and embedded systems. Strong problem-solving abilities with a focus on clean, efficient code and practical, team-driven solutions.

EDUCATION

Pursuing Bachelor of Science:
Computer Science and
Engineering Technology

University of Toledo
Expected Graduation Date: Dec 2026
GPA: 3.26

PROFESSIONAL EXPERIENCE

Software Engineering Intern
Worthington Steel: Aug 2024 – Dec 2024 & May 2025 – Present

Software Engineering Intern contributing to team projects, helping resolve technical issues, supporting development efforts, and completing independent assignments. Worked with multiple departments to improve processes and deliver effective solutions.

TECHNICAL SKILLS

- Python
- Java, Javascript
- C, C++
- HTML, CSS
- Visual Basic .NET
- SQL, Database Design
- Data Structures & Algorithms
- Visual Studio, Visual Studio Code
- REST API Integration
- Automation & Scripting
- Embedded Systems
- Network Fundamentals
- Git & Version Control
- Microsoft Office

PROJECTS

- API Integration**
Created and maintained a Python-based API for company logistics and statistics, continuously populating website data for tracking and visibility. Designed for long-running, unattended operation.
- Visual Basic .NET Interface**
Developed and maintained a Visual Basic .NET interface to display operational data for line workers. Implemented features including save, undo/redo, and simultaneous input/output of over twenty configurations.
- ESP32 Embedded System Configuration**
Designed and configured an ESP32-based embedded system integrating GPIO inputs and an external audio interface. Implemented button-triggered input handling to control audio playback through an external speaker.
- Personalized Website**
Developed frontend components for a client website using HTML, CSS, and JavaScript. Implemented responsive layouts and iterated on designs based on
